INTRODUCTION OF DRILLING RIG SUPPORT

Welcome to Drilling Rig Support, one of the most progressive hiring and training agencies in the Oil & Gas and Geothermal Drilling Industry today.

All of our partners in the company have significant experience working with operators, drilling contractors and project groups and over 30 years of proven knowledge in the Oil & Gas and Geothermal drilling industry and 10 years in Oil & Gas and Geothermal drilling Training.

We offer subject matter experts (SME's) who can audit and update your SOP's, HSE Manuals, and Training and Development manuals.

We will recruit, train, and deploy nationals to meet tomorrow's business needs, in alignment with your companies expectations. This includes taking University graduates with high GDP's and training them to become your future Drilling Engineers and Drilling Supervisors. This is a long term approach that will solidify your business needs in your forward plans to nationalize your workforce while reducing costs.

Vision Statement

To be the industries preferred Oil, Gas, and Geothermal Service Company for Customers, Business partners & Employees.

To be an Industry leader, with unparalleled commitment to ensure that the product we offer will support our clients, both in protecting it's personand being in line with their company policies. We will strive to be the company of choice for investors, partners, customers, neighbors and employees.

Mission Statement

Core Values

Teamwork. We will work together and learn from each other's strengths and experience. Excellence. We will maintain the highest standards in quality, integrity to meet and exceed our goals. Resilience: We will remain strong and united in the face of challenge, knowing we are committed to the industry for the long haul.

SERVICES AT A GLANCE

TRAINING GRADUATE PROGRAMS

Reviewing and updating your HSE manuals and procedures.

STANDARD OPERATING PROCEDURES

Standard operating procedure to prepare review and approve the Standard operating procedures and ensuring regulatory compliance

PERSONNEL RECRUITMENT

All personnel that are recommended to your company will have gone through a comprehensive screening process, along with an online competency test, to identify.

- A. Their job knowledge, skills and ability.
- B. To ensure their behaviors are linked to the core values and competency framework of your company.

TRAINING PROGRAMS

Drilling Rig Support offers Exceptional World-Class Oil, Gas and Geothermal Training by Experienced Industry Experts. We provide a complete range of public and in-house training courses – tailored, knowledgeable, and practical training solutions for the Oil, Gas and Geothermal industries.

TRAINING GRADUATES

Training of university graduates or current employees to become Drilling Engineers, Drilling Supervisors

Our Teams includes subject matter experts who can provide this service, which will not only benefit your company financially but will build a team of employees who have proven their ability through the training course and their hands-on training in the field.

Our services include:

- Build a training course that is in line with your company requirement for the future.
- Along with the client, we will interview graduates from local universities who have high GDP's and have degrees in Drilling Engineering and Petroleum engineering.
- Build a training program that includes both in-house and in-field training.
- Each in-house training course will be followed by a final examination.
- Pass marks will be set for each examination.
- Following their tours in the field, they will have post-trip interviews with their instructors and a training profile will be built on each candidate which can be reviewed by the client.
- A full business plan showing the benefits of this long term approach will be available on request.

HSE MANUALS

Our Team includes subject matter experts that can update your HSE manuals, PTW procedures, Safety Case and Safety Management documentation to meet the ever-increasing demands of today's Oil & Gas, and Geothermal industries.

Our services include:

Reviewing with your management team your current HSE manuals and procedures.

- Auditing your standards in the field.
- Review government regulations relating to operational excellence.
- Update HSE manuals as required.
